

ISO-DRAIN® BUTYL STRIPS

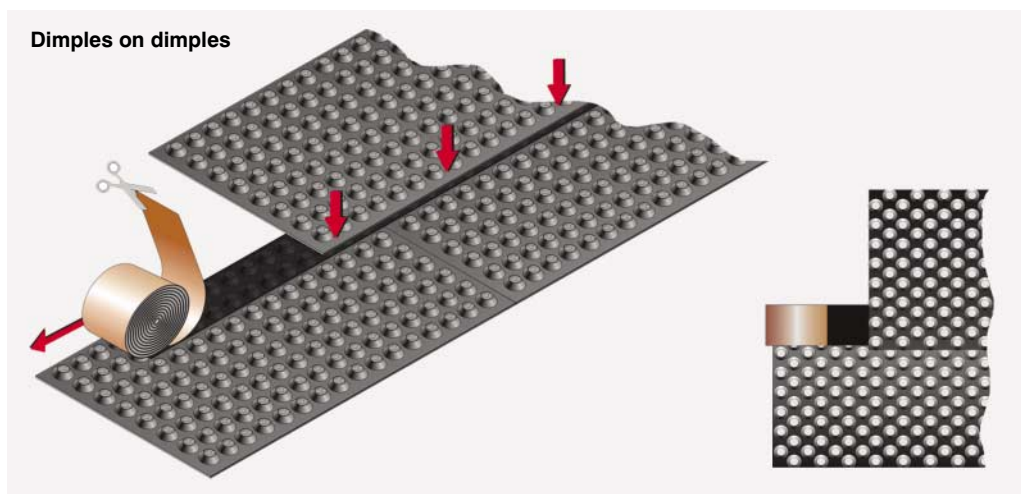

INTERPLAST BUTYL STRIPS:

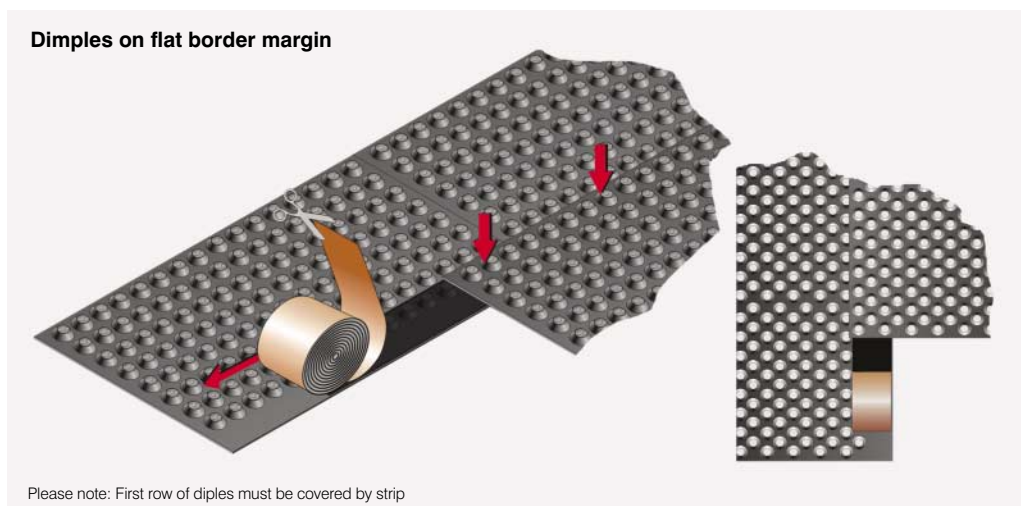

INTERPLAST BUTYL STRIPS are used to securely join INTERPLAST dimpled sheets. Whether used to bond dimples to dimples or dimples to the flat border margin,

they provide a durable connection between adjacent sheet sections. This system also provides an outstanding barrier against moisture.

Dimples on dimples

Dimples on flat border margin

Please note: First row of dimples must be covered by strip

Dimensions:

Material thickness: 1.5 mm
 Roll width: 40 mm
 Roll length: 40 m
