

The Latest News in the World of Dimpled Sheet:

INTERPLAST® NEWS

Estádio do Sporting: Lisbon, Portugal

With over 30,000 m² of ISO-DRAIN 8 DIAGONAL dimpled sheet!

The Lisbon sports stadium: a typical application for INTERPLAST dimpled sheet. Installed as a blinding bed between the waterproofing membrane and the

steel reinforcing grid, it provides ideal structural protection over an area of more than 30,000 m².

Dimpled Sheet – The Ideal Blinding Bed...

Installed horizontally, ISO-DRAIN 8 DIAGONAL dimpled sheet from INTERPLAST provides an ideal blinding bed beneath poured concrete layers.

It provides the following benefits:

- no additional excavation required
- no lean concrete required
- rapid installation in any weather
- no curing time
- significant cost savings
- extremely rugged and durable

INTERPLAST blinding beds reliably protect structures against subgrade moisture.
